

RIVERSIDE CANCER CARE SERVICES

2013 Annual Report

We Take Cancer Personally

RIVERSIDE

Cancer Care

The Year in Review

During the past year Riverside Cancer Care maintained and expanded its national and regional recognition through quality, outcomes, safety and satisfaction measures that form the basis for continuing accreditation, credentialing and awards.

Equally important, 2013 was a year in which our ongoing commitment to accurate diagnoses, comprehensive and integrated treatment and effective follow-up care made it possible for people throughout the southeast Virginia communities we serve to access exceptional cancer care close to home and family.

Our multidisciplinary cancer team, consisting of oncology specialists and subspecialists, nurses, radiation therapists and other medical professionals with specific training and experience in cancer care, continued to provide a broad range of clinical services throughout 2013.

At the same time, Riverside continued extensive educational and outreach initiatives, including a growing number of screenings, strong community partnerships, participation in national clinical trials and specialized and highly personalized treatment programs while also completing its second full year of providing genetic counseling.

While we maintained a strong emphasis on leading-edge clinical care in 2013, we also expanded our focus on the emerging field of Integrative Medicine. Developed to help reduce stress, counter some of the specific side effects of conventional cancer treatment and improve overall quality of life, Integrative Medicine is available to our patients at no charge through the generosity of the Riverside Foundation and its contributors. Services and programs include massage, yoga, music and art therapy, nutritional guidance, family and care giver support and other resources directed to whole patient care.

Taken together, the full range of Riverside's Cancer Care services – its extensive programs, skilled and experienced people, advanced technology and enduring commitment to personalized care -- are a reflection of our mission to treat the people we care for as we do those we love.

Our Reach and Our Facilities

Riverside Cancer Care serves individuals and communities throughout southeastern Virginia through a wide range of inpatient and outpatient treatment and diagnostic locations. The broad geographic distribution of these healing environments, supported by skilled and experienced staff and state-of-the-art technology, helps assure that a growing number of patients have access to high quality cancer care closer to home.

Prevention, Early Detection and Outreach

From a purely economic standpoint, preventive care offers significant benefits per healthcare dollar invested. From the human perspective, education, screening and any other intervention that can prevent or delay the onset of disease has an even greater value.

For these reasons, Riverside offers a wide range of cancer information, awareness and screening opportunities throughout the communities we serve. In 2013 the screenings, many of which were provided free or at low cost focused on breast cancer, skin cancers, prostate cancer, cervical cancer and oral cancers. Riverside also offers low-dose CT scans for the early detection of lung cancer.

Carried out through facility-based services as well as through community outreach, all of these initiatives are designed to increase awareness related to cancer prevention and services and to help detect cancer at the earliest possible stage when it is most treatable.

As a regional health system and as individuals we believe that education, prevention and outreach are an essential part of our mission and our efforts in those areas also include screenings and educational events carried out with community, corporate and non-profit partners. In 2013 as in every year, Riverside Cancer Care was represented in a wide range of Riverside sponsored and partnered events and activities including:

Peninsula & Mid-Peninsula - *Data is from January - October 2013*

Screening Activities

Women's Health Screening Events: 4, over 204 women seen for pap smears and breast exams

Gloucester Mathews Free Clinic, Monthly Pap smear

and Breast Screening Clinic: 96 women seen (pap smears, breast exams)

Prostate cancer screenings: 4, 65 men seen for DRE and PSA

Tappahannock Free Clinic Monthly Pap Smears: 88 women seen

Outreach and Education Activities

Health Fair Events: 11, over 548 people seen; breast, skin, prostate and general cancer info

Canon Wellness Wednesdays: 4, skin, breast, prostate cancer awareness and nutrition

Talks: colon, breast cancer awareness, breast health and early detection

Doctor Is In at Patrick Henry Mall Talks: breast cancer awareness with the Integrative Medicine team, skin, prostate and general health

Forum on Aging and Focus on Colorectal Cancer: teamed with Peninsula Gastroenterology for discussions

American Cancer Society: Cancer Prevention Trial (CPS3) enrolled a total of 94 people at two sites - Newport News and Gloucester

Distribution of Breast Health Awareness Packets: during October Breast Cancer Awareness Month, 2500 packets handed out at mammography centers, talks and other health events

Partner Events

American Cancer Society - Relay for Life, Making Strides against Breast Cancer

Beyond Boobs Support Group - Petals for a Cure, Run for the Hills

Leukemia and Lymphoma Society - Light the Night

Survivorship Programs

American Cancer Society's Look Good Feel Better programs (Peninsula and Gloucester)

Transitions, Post-Treatment Support Group

American Cancer Society's Nutrition Before, During and After Cancer Treatment

Breast Cancer and Caregiver Support Group

General Cancer and Caregiver Support Group

GYN Cancer Support Group

Leukemia and Lymphoma Cancer Support Group

Lost Chord Cancer Support Group

Cancer Survivor Conference

Prevention, Early Detection and Outreach cont.

Shore - Data is from January - October 2013

Screenings Activities

Skin cancer screening event: 59 participants, 41 referrals for further evaluation or treatment

Prostate cancer screening event: 5 participants, 1 referral for further evaluation or treatment

Breast cancer awareness day: 20 participants, 6 women qualified for Every Woman's Life (EWL)

Breast cancer Screening: 343 mammograms and 27 ultrasounds provided as part of the Eastern Shore VDH EWL grant

Outreach and Education Activities

Health Matters radio commercials: air twice a day on two radio stations over 11 weeks throughout the year on cancer-related topics including skin cancer, colorectal cancer, kid's skin cancer, early detection, digital mammography and gastroenterology pill camera capability

Radiothon fundraiser and awareness event: focused on prevention and early detection, more than 30 patients, physicians, team members and volunteers participated, raising nearly \$9,000

CPS3 kick-off event and enrollment event at RSMH: Teamed up with Eastern Shore Rural Health System to enroll 96 participants.

Colorectal cancer awareness event presented by Dr. Ridout

Colorectal cancer awareness talk by Dr Ridout to Gaskins Chapel Women's Retreat

Quit tobacco classes

Shore Fest fundraiser

Education for referring primary care physicians: Dr. Klein conducted sessions on what is new in cancer treatment

Lung Cancer Lunch & Learn for employees and public: Presented by Dr. McDaniel

Marquee Messages "get a mammogram" on 20 community businesses

Mammography education for 129 Harvest Festival attendees

Zumbathon to benefit local cancer center

Same-day mammography appointments offered to employees during October

Partner Events

Cancer Center staff supported the following outreach events:

- Grandparents Day at Pungoteague Elementary School
- Healing Measures Women's Expo
- ESAAA Senior Health Fair
- Harvest Festival breast cancer awareness
- ES Birding Festival breast cancer awareness
- Relay for Life sponsorship

Survivorship Programs

Look Good Feel Better programs: 2

American Cancer Society sponsored support groups:

Breast Cancer and Caregiver Support group

Man to Man Support group

Community Partnership Highlight: *Every Woman's Life*

The Every Woman's Life (EWL) program is a federally-funded initiative that originated in 1998 to meet the growing health concerns created when women delay or don't receive screening mammograms and PAP smears because they can't afford them. Originally established through the Centers for Disease Control and Prevention, the program now operates through a federal grant administered by the Virginia Department of Health.

In addition, legislation passed in 2001 by the Virginia General Assembly makes it possible for EWL clients diagnosed with cancerous or pre-cancerous conditions of the breast or cervix to receive treatment under the Breast and Cervical Cancer Treatment Act.

The uninsured and underinsured women with limited income who are enrolled in EWL receive Pap smears, pelvic examinations, clinical breast examinations, and mammograms with diagnostic testing as required. Access to these screening exams and preventive care services offers early detection of breast and cervical cancer, improves treatment options and outcomes and increases survival rates.

Riverside has held an Every Woman's Life grant for the last 15 years. We provide screening and diagnostic services for women living in the Peninsula and Three Rivers Health Districts, which comprise 12 counties and 3 cities.

Federal – For women aged 45-64 1998 to June 30, 2013

| | |
|--|-------|
| Total number women enrolled into Federal grant | 2,318 |
| Total number age 50-64 | 1,811 |
| Total number age 45-49 | 378 |
| Total mammograms provided | 5,175 |
| Total diagnosed with breast cancer | 87 |
| Total diagnosed with pre-cancerous breast conditions | 15 |
| Total breast biopsies | 313 |
| Total pap smears provided | 2,488 |
| Total cervix procedures | 5,085 |
| Total diagnosed with cervical cancer | 1 |
| Total diagnosed with pre-cancerous cervical conditions | 41 |

EWL - State Grant for women age 18 to 44 2005 to June 30, 2013

| | |
|--|---------|
| Total seen under the state portion of the grant | 320 |
| Total number age 18-44 | 306 |
| Total mammograms provided | 299 |
| Total breast biopsies | 86 |
| Total diagnosed with breast cancer | 10 |
| Total diagnosed with pre-cancerous breast conditions | 1(LICS) |
| Total pap smears provided | 209 |
| Total cervix procedures | 674 |
| Total diagnosed with pre-cancerous cervical conditions | 70 |

Community Partnership Highlight: *Every Woman's Life*

Comparison with other Non-Riverside Every Woman's Life - Statewide

| | |
|--|------------------------|
| Total sites enrolling currently/those holding the EWL grant | 32 including Riverside |
| Total women enrolled into EWL from the beginning through June 30, 2013 | 39,606 |
| Total mammograms provided | 95,690 |
| Total pap smears provided | 59,729 |
| Total breast cancers diagnosed | 1,014 |
| Total cervix cancers diagnosed | 64 |

Oncology Patient Navigation

Now in its eighth year, the Riverside Oncology Patient Navigator program provides a one-on-one support resource that helps people and their care givers better manage the sometimes overwhelming experience of the health care system in general and cancer care in particular. Available to patients at no cost, the program includes a team of four specially trained Navigators with clinical and educational backgrounds who provide advocacy and direct assistance to patients in the following diagnostic areas:

- Breast Cancer
- Lung Cancer
- Prostate Cancer
- Colorectal/Pancreatic Cancer

Riverside Oncology Patient Navigators assist patients and family members with everything from appointments and transportation issues to financial challenges and family education. They coordinate care with other members of the cancer treatment team and help patients access a wide range of other Riverside and community-based resources.

Available to patients throughout the Peninsula, Williamsburg and Gloucester areas, Oncology Patient Navigators add a very personal touch while facilitating access to Riverside Cancer Care treatments and services.

2013 Navigation Referrals

| | |
|---|------|
| Total referrals (1st-3rd Quarters): | 439 |
| Total breast Navigator referrals: | 175 |
| Total prostate Navigator referrals: | *108 |
| Total lung Navigator referrals: | 67 |
| Total colorectal/digestive Navigator referrals: | 89 |

* There was no Prostate Cancer Navigator in place for July, August, or September.

Oncology Nutrition

Nutrition plays an important role in many aspects of cancer prevention, treatment and survivorship. As part of an integrated approach to care, we recognize the impact nutrition can have on cancer patients.

In order to improve quality of life and overall outcomes, while also reducing the severity of treatment side effects, Riverside places a strong emphasis on good nutrition practices that can help cancer patients maintain weight and the body's nutrition stores. Toward this objective, patients with compromised appetites or poor nutritional status are referred to one of two Riverside staff dietitians who hold national certifications in oncology education and consultation regarding food, diet, supplementation and chemotherapy.

Each month, in conjunction with the American Cancer Society, our dietitians present "Nutrition and Exercise: during and after Cancer treatment" to our patients, their families and care givers and any interested members of the community. These sessions reach hundreds of participants each year. In addition, our dietitians provide personalized assessments, nutritional information and dietary recommendations to an average of 20 patients per week.

2013: Total Patient Contacts to Date by Location

| | |
|---------------|----------------------|
| Williamsburg: | 591 patient visits |
| Gloucester: | 418 patient visits |
| Newport News: | 1,046 patient visits |
| Shore: | 100 patient visits |
| Southside: | *70 patient visits |

* Services began summer of 2013

Clinical Trials

Riverside participates in a range of clinical trials in collaboration with the National Cancer Institute (NCI) as well as in network, university and pharmaceutical studies.

These research studies involve people and are carried out to identify new ways to prevent cancer, diagnose and treat the disease and manage symptoms. Many of the cancer treatments that are now considered to be the standard of care – and are currently benefiting patients – initially incorporated clinical trials as part of their development

In all clinical trials we are required by law to include a protocol or action plan for each patient as well as informed consent. Clinical trials are generally carried out in four separate phases (designated by Roman numerals) each with a different purpose related to the safety and efficacy (effectiveness) of the treatment.

Riverside takes part in Phase II, III and IV clinical trials. These phases help determine if the new treatment has an affect on cancer and how it compares to the current standard treatment while also assessing the long-term safety and effectiveness of the treatment. During 2013 Riverside patients participated in targeted chemotherapy trials related to the following cancer diagnoses:

- Breast
- Lung
- Prostate
- Hematological conditions
- Hereditary cancers

| # Enrolled | Clinical Trial |
|------------|---|
| 1 | Prevention (breast) |
| 4 | SWOG (prostate) |
| 20 | 012013 (breast) |
| 1 | Simplicity (CML - chronic myeloid leukemia) |
| 10 | Amgen 0147 (breast) |
| 8 | HM13194 (breast) |
| 1 | HOG-BRE 09-146:A (breast) |

| 3 | Cleveland Clinic PTEN (hereditary cancers) |
| 2 | USO 12118 (MDV3100-09) :A (prostate) |
| 1 | LDK 378 (lung) |
| 55 TOTAL (thru October 2013) | |

Accreditations, Certifications and Awards

When national standards for cancer care were first introduced 30 years ago, Riverside was the first health system to meet them. This tradition continued through 2013 with multiple national and regional accreditations, certifications and awards which reflect our high level of commitment to cancer care.

Included is Riverside Regional Medical Center's accreditation by the American College of Surgeons Commission on Cancer (CoC) which has been achieved continuously in three-year increments over the past three decades. Riverside Walter Reed Hospital Cancer Care Services also carries the CoC designation and is the only accredited cancer program on the state's Middle Peninsula. Shore Memorial Hospital has had their CoC designation since 2000 and is the only hospital serving the communities of the Virginia Eastern Shore.

What this level of accreditation means to the individual patient and his or her family is an acknowledgment of quality standards exemplified by comprehensive care including leading-edge services and technology, a multidisciplinary team approach to cancer care, the ability to help patients access ongoing cancer clinical trials and new treatment options, resources for prevention and early detection programs, along with education and support services. This accreditation also guarantees provision of a cancer registry that provides lifelong follow up for each patient through the collection of data on type and stage of cancers and treatment results.

For individuals throughout the region we serve it also means having exceptional, nationally recognized cancer care close to home, led by a medical team that provides a coordinated and highly personalized approach to cancer care.

In addition to recognition by the American College of Surgeons Commission on Cancer, Riverside has also received the following accreditation, certifications and awards:

Breast Imaging Center of Excellence

Locations:

Riverside Diagnostic & Breast Imaging Center
Riverside Diagnostic Center – Williamsburg
Riverside Walter Reed Hospital

The breast imaging services at each of these locations are fully accredited in Mammography, Stereotactic Breast biopsy, Breast Ultrasound & Ultrasound – guided breast biopsies. Additional requirements include peer-review evaluations conducted in each breast imaging modality by board-certified physicians and medical physicists who are experts in the field.

The American College of Radiology has recognized our high practice standards in image quality, personnel qualifications, facility equipment, quality control procedures and quality assurance programs.

As of Oct 2013, ACR reports 203 facilities are accredited in Mammography in the state of Virginia. Of these facilities, 30 are recognized as a Breast Centers of Excellence. Riverside Diagnostic and Breast Imaging Center was the first on the Peninsula to achieve this recognition.

American College of Radiology - Radiation Oncology Accreditation

Riverside Radiation Oncology at Newport News, Williamsburg, Gloucester and Shore gained re-accreditation for July 16 2013 through July 31, 2016. The ACR has accredited imaging and treatment modalities since 1987, with a focus of safety and quality. In radiation oncology, quality assurance practices, patient records, equipment, treatment planning and staffing are peer reviewed to provide an impartial assessment of patient care and safety.

QOPI® Certification

Riverside Cancer Infusion Center, Shore Cancer Center, and Cancer Specialists of Tidewater have received the Quality Oncology Practice Certification which recognizes medical oncology and hematology/oncology practices that are committed to delivering the highest quality of cancer care with an evaluative focus on areas that affect patient care and safety. The Quality Oncology Practice Initiative (QOPI®) is a practice-based quality improvement initiative based on retrospective chart reviews conducted within hematology-oncology practices.

CoC Outstanding Achievement Award

This award is designed to recognized programs that have excelled in all areas of commendation. The following Riverside CoC accredited facilities have received this award.

2011- Riverside Walter Reed (new program OAA), accredited since 2012

2012- Riverside Regional Medical Center, accredited since 1982

National Accreditation Program for Breast Centers (NAPBC)

Riverside Regional Medical Center, has recieved accreditation from the National Accreditation Program for Breast Centers (NAPBC). This is the the second cancer accreditation in the country and is a voluntary commitment. The focus of this accreditation is on diagnosis as well as the treatment of breast cancer.

The National Accreditation Program for Breast Centers (NAPBC) has recognized our focus on center leadership, clinical management, research, community outreach, staff education and quality improvement.

Riverside Health System Foundation

Riverside Health System's commitment to the communities it serves throughout the region include the resources of the Riverside Health System Foundation and its mission to provide philanthropic support for services and programs that would not be possible without the generous contributions of individuals, families, organizations, corporations and private foundations. The Riverside Health System Foundation helps support initiatives that are specific to Riverside Cancer Care including the two funds highlighted below:

The Riverside Foundation Tree of Life Cancer Fund: Established to support the unmet needs of our patients ranging from medical appointment transportation and medication to utility bills and screenings, the Tree of Life Cancer Fund helps patients know they are not alone during times of serious health challenges. In 2013, this fund was enriched through the generosity of Tim and Claudia Bellars who presented the Riverside Foundation with a \$50,000 gift designated to honor Ricky Newton, Director of Peninsula Cancer Institute and Cancer Specialists of Tidewater.

Mark E. Ellis Endowment Fund for Cancer Care Advancement: Every day, Riverside underwrites an average of \$2,100 to provide cancer patients with Integrative Medicine. Gifts to the Dr. Mark E. Ellis Endowment Fund for Cancer Care Advancement will help ensure our patients continue to receive Integrative Medicine therapies at no cost. This gift destination reflects the legacy of the late Dr. Ellis, a medical oncologist who served our communities for decades and helped pioneer an approach to cancer care that focuses on the whole person. Both of these funds provide an opportunity for personal and organizational generosity as well as a chance to turn a vision of "giving back" into a reality. Gifts to these funds are tax-deductible to the fullest extent allowed by law. For more information please call (757) 234-8740. To contribute to either of these funds please go to riversideonline.com/foundation or call us.

*(Left to Right) Claudia Bellars,
Tim Bellars, Ricky Newton,
Lynn Hamilton Ellis*

Program success depends on effective, multidisciplinary cancer committees. The cancer committee is responsible for goal setting, planning, initiating, implementing, evaluating and improving all cancer-related activities in the program.

The Riverside Care Difference

Every member of our team commits to the Riverside Care Difference when they join Riverside. Our Riverside Care Difference is the way in which we deliver care and services, as a team, by putting our patients and customers at the heart of all we do. The Riverside care Difference represents our ongoing commitment to provide you with the best care possible:

- **To keep you safe**
- **To help you heal**
- **To treat you with kindness**
- **To respect your wishes**
