The Riverside Health System is one of Virginia’s most comprehensive healthcare providers and one of the area’s most exciting resources for career opportunities.

For those prepared to make full use of their acquired and potential skills, we offer a wide range of facilities that includes a regional medical center and rural community hospitals. We also offer multiple facilities specializing in physical care and rehabilitation, behavioral health care, convalescent care, physician care, managed care, diagnostics, outpatient services and retirement living.

The people who make up the Riverside family are bound by the shared belief that each of us can make a difference in the lives of others. The belief in the ability to “Make a Difference” is a cornerstone of our organization. We support this belief by inspiring and encouraging our employees’ dedication and passion for serving others.

After reviewing the opportunities described in the following pages, we hope you will consider Riverside as a fulfilling and rewarding career destination.

Making A Difference And Professional Fulfillment

Each day, thousands of people in diverse locations earn a living and fulfill their professional lives within the Riverside Health System. Together they put a human face on one of the most extensive and comprehensive healthcare resources in the region. But beyond their large numbers, their strength lies in the fact that each individual, through his or her words and actions, can impact the lives of the people they serve.

This ability to make a difference in the lives of others is a powerful force in enhancing the quality of care we provide, improving the patient’s personal experience with us, and touching their families and loved ones.

At its basic level, making a difference is the result of making a choice. For the people of Riverside, it’s the choice to work in a caring profession. For our patients, it’s choosing the best available care for a wide range of health and wellness services. For the residents of our communities, it’s the choice to use Riverside resources to help them lead a healthier life.

The Right Employer For The Right People

Every enterprise gains its strength from the individuals who are part of it. We believe Riverside will maintain its position as a leading health system as long as we can retain and attract the most skilled and best-trained healthcare professionals available. And we know that these kinds of talented people can only grow and flourish in an atmosphere where individual insights and initiatives are both valued and supported. We think this type of atmosphere is where you’ll want to be.
Riverside Regional Medical Center

Riverside Regional Medical Center is a 576-bed facility and is the region’s leading medical center. A vast number of career opportunities are available at this facility. The medical center offers challenging jobs for more than 3,000 dedicated people. Nearly 500 physicians in 40 separate areas of specialty practice medicine here. Assisting this staff are 500 volunteers whose primary focus is helping others.

Preparing for the future, Riverside has begun a $242 million major redesign and expansion, to meet the needs of our community well into the 21st century.

A new level two Emergency/Trauma Center, consisting of 48 private treatment rooms, allows the staff to treat any emergency while maintaining our patients’ privacy. World class Gamma Knife technology will arrive on campus in 2006.

Riverside’s mobile PET scanner, multiple MRI units and CT scanners are key diagnostic tools used at our nationally accredited Regional Cancer Center. New larger surgery suites are being built to make room for our award winning open-heart surgery program.

Combining the latest technology, an aesthetically pleasing environment and talented people is creating the perfect setting for Riverside to improve health and save lives.

Riverside Walter Reed & Riverside Tappahannock Hospital

Hospital employment opportunities are wide ranging, and include positions at facilities in Gloucester and Tappahannock. The staff at Riverside Walter Reed Hospital in Gloucester
supports nearly 85 outstanding physicians, as well as affiliate staff in neurology, neurosurgery and radiation oncology. The 24-hour emergency room treats about 15,000 cases a year.

Through Walter Reed Hospital, Middle Peninsula residents receive comprehensive home care services through our Home Health Agency. Riverside mobile services also provide magnetic resonance imaging, lithotripsy and other diagnostic services.

The work of nearly 100 active volunteers strongly enhances the daily operations at Riverside Walter Reed Hospital.

Riverside Tappahannock Hospital has been part of the Riverside system since 1989. The 92-bed facility serves citizens in the large rural area known as the Northern Neck. As healthcare technology progresses, so have the additions to Riverside Tappahannock Hospital. Some examples are the Outpatient Infusion Center; the addition of the Progressive Care Unit, Pain Management Clinic; and the mobile Services Center. The Services Center adds cardiac catheterization, mammography and lithotripsy technology to Tappahannock’s array of healthcare services.

Physician specialties at the hospital include anesthesiology, cardiology, emergency medicine, gastroenterology, general surgery, pediatrics, internal medicine, orthopedic surgery, pulmonology, radiology and urology.

Other hospital services include echocardiography, EEG, EKG, emergency treatment, home health and hospice, laboratory, non-invasive vascular lab, radiology including CT scanning, mammography, nuclear medicine, tomography and ultrasound, and an infusion center for outpatient chemotherapy.
Opportunities in Physical Rehabilitation

**Physical Rehabilitation**
Located on the waterfront in Newport News is Riverside Rehabilitation Institute, the largest freestanding rehabilitation hospital in Virginia. The Institute’s staff offers inpatient and outpatient care for the treatment of stroke, head and spinal cord injuries, chronic physical disorders, general weakness and various kinds of orthopedic conditions and joint replacement.

Here the experienced staff provides rehabilitation therapies, with individualized programs designed to maximize each patient’s remaining abilities. Services at this busy rehabilitation hospital also include physical, occupational and speech/language therapy.

The Institute staff also offers services not often found at some rehabilitation facilities, such as an adaptive driving training program, an amputee clinic, a wheelchair seating and positioning clinic, aquatic physical therapy and pain management rehabilitation services.

Riverside Rehabilitation Institute recently added a fifth physiatrist to its medical staff and expanded the physicians’ Outpatient Clinic. The clinic now includes an expanded waiting area, eight examination rooms, office space for the physicians and a conference room.

The Institute’s campus also includes Riverside Shoreview Medical Center, a 6,000 square foot building that houses outpatient physical rehabilitation services and the Chesapeake Avenue Renal Care Center.

Opportunities in Convalescent Care

**Convalescent Centers**
Americans are living longer, more active lives than ever before, and are in greater need for Riverside long term care. We, in turn, have a continuing need for healthcare professionals to work with residents and family members to provide individualized care plans to fit those needs.

Our range of convalescent care programs includes adult day care, respite and vacation care, assisted living, skilled nursing and rehabilitation services and convalescent care. Fulfilling the needs for both the young and the elderly, our bright, newly renovated centers provide a positive, caring environment so necessary for recovery.

There are Riverside Convalescent Centers in several locations including Newport News, Hampton, Williamsburg, Gloucester, Smithfield, Warsaw, West Point, Saluda and Mathews. Riverside also offers two locations for adult day care services in Newport News and Williamsburg.
Opportunities in Home Care and Renal Care

HOME CARE
Riverside Home Care Services is based on the premise that we feel most at ease in our homes, surrounded by familiar things and people we love. It’s no surprise, therefore, that the home is overwhelmingly the preferred place to be when recovering from illness or injury.

Riverside began providing care in the home in 1982 and has expanded its services as far as Tappahannock. The “transition nurses” based at our three acute care hospitals help coordinate the continuity of care to the patient’s home after hospitalization.

Remarkable innovations in “portable technology” and efforts to limit costly hospital stays have brought dramatic growth in the scope of Riverside home care. Working in home care might consist of providing hospice care for the terminally ill, wound care or intervenous therapy for pain management. It might also involve nutrition, hydration, cancer treatment or antibiotic therapy.

RENAL CARE
Seven modern dialysis centers care for citizens with kidney failure. These facilities are located in Newport News, Gloucester, Norge, Smithfield and Williamsburg.
Offering many challenging positions in the mental health field is Riverside Behavioral Health Center, which provides psychiatric and chemical dependency services to children, adolescents and adults. Riverside acquired the 125-bed facility in April 2000. The Center offers the immediate options that often are demanded in crisis situations. The Center also provides mental health care at Riverside Regional Medical Center.

For example, the RESPOND program offers 24-hour, seven-day a week, confidential comprehensive assessments and referral assistance for psychiatric and chemical dependency problems. The RESPOND team registered nurses are mental health professionals experienced in assisting individuals, families and professionals.

Services available on the 11.6-acre campus include adult psychiatric and chemical dependency help, as well as child and adolescent residential treatment.

New Foundations and Outpatient Psychiatric Services is located in Oyster Point in Newport News. In addition to providing outpatient drug and alcohol treatment programs for adults and adolescents, New Foundations has recently become licensed to provide Outpatient Psychiatric Services for children, adolescents and adults. New Foundations has been named one of three BEST PRACTICES in the Commonwealth of Virginia by Anthem.
Opportunities At Our Outpatient Centers

There are Riverside outpatient centers throughout the Peninsula, which enable many healthcare professionals to find the meaningful work they prefer conveniently located near their homes. These facilities include centers for surgery, and diagnostics.

The One Day Surgery Center at the Riverside Regional Medical Center handles the more complex surgical interventions of modern medicine. Our physicians perform more than 5,500 same day surgeries a year. One day surgery also is performed at Riverside Walter Reed Hospital and Riverside Tappahannock Hospital. The Riverside Surgery Center-Warwick provides an ambulatory surgery option for area physicians. Here, surgeons perform ophthalmology, podiatry, ENT, gynecology and gastrointestinal procedures.

The Peninsula Surgery Center on the campus of Riverside Regional Medical Center, is a state-of-the-art facility jointly owned by area physicians and Riverside, operating as a department of Riverside Regional Medical Center. Surgeons perform outpatient orthopedic, gynecologic, ENT and general surgical procedures.

The new Doctors Surgery Center which opened in 2004, is located at the Riverside Healthcare Center-Williamsburg. This beautiful new facility is owned and operated by Williamsburg area surgeons and Riverside.

Riverside also provides mobile technologies to every corner of our service area. Mobile cardiac catheterization, MRI, lithotripsy and a PET scanner support our more rural service areas.

Riverside Healthcare and Diagnostic Centers are located in Newport News, Williamsburg and Carrollton. The all digital diagnostic center in Williamsburg is our newest diagnostic center. It operates in a totally filmless environment and houses one of the most advanced digital mammography units.

More than 600 healthcare workers are engaged in challenging careers with Riverside Physician Associates, a physician network with more than 65 practice locations. The organization features nearly 200 board-certified physicians and serves the medical needs of residents in Hampton, Newport News, Williamsburg, Smithfield, Isle of Wight, Yorktown, Grafton, Gloucester, Hayes, Tappahannock, Warsaw and Deltaville.

Network services include traditional family practice, internal medicine, pediatrics, OB/GYN services and urgent care. Other specialty care areas include nephrology, psychiatry, rehabilitative medicine, business health, general surgery, radiology, urology, pulmonology and ophthalmology.
Since opening its first facility in 1982, Riverside has become a leader in hospital-based wellness and fitness. We operate five facilities where thousands of members benefit from the latest equipment, quality programming and educational offerings. Our wellness and fitness centers successfully blend traditional fitness with preventive care and on-site rehabilitation for cardiac, pulmonary and physical therapy patients.

Some facilities offer indoor and outdoor tennis, racquetball and aquatic programs. The professional staff includes exercise physiologists, massage therapists, registered dietitians, certified personal trainers and aquatics facility personnel. All are CPR trained. Center locations vary from rural to suburban to urban settings.

Exciting Jobs In Wellness And Fitness
Further Your Healthcare Education With Riverside

Whether it is training for a healthcare career, continuing education or educating the community, Riverside has a strong tradition in health education. We offer a variety of education opportunities to women and men interested in careers in healthcare through the Riverside School of Health Careers.

Our School of Professional Nursing has developed nurses since 1918, and each year approximately 75% of the graduates stay with Riverside to provide outstanding nursing care. We also work with Newport News Public Schools to operate schools of practical nursing, and surgical and radiologic technology. The schools offer excellent opportunities for qualified healthcare professionals.

Other educational opportunities at Riverside include renal dialysis, nurses aide, unit secretary training and EMS training.

Riverside has been a leader in healthcare for decades with its emphasis on employee education and development. Riverside’s Center for Organizational Excellence is dedicated to mission success through the development of great people like you! The Center offers traditional and electronic education and development in a variety of areas, as well as assessments, developmental tools and resources to help make every employee a valued, vital member of the Riverside team.
Riverside is a vibrant career destination for a special kind of person. That special person has a keen desire for professional challenge and fulfillment. That person also feels a burning need and commitment to help other people.

That special person understands and appreciates how one person can make a tremendous difference in the lives of many.

If you’re that kind of individual, we hope you’ll join us at Riverside to help us in our effort to improve health and save lives in our community. We will appreciate your contribution, and we think we can offer you a wonderful experience.

What Can Riverside Offer You?

A variety of healthcare and wellness positions are filled at our three beautiful retirement communities, Patriots Colony at Williamsburg, Warwick Forest in the Denbigh area of Newport News and Sanders in Gloucester. Each of these facilities offers a full range of services and activities designed to offer seniors an active, worry-free lifestyle.

Our beautiful retirement communities set the standard for quality in the region and offer cottages, villas and homes for independent living residents, and they provide housing for assisted living residents and special units for those who require care because of Alzheimer’s or other dementias.
